WRITING

Now, in world of technologies, shopping parted for online and in-store. My project aimed at finding out which way of shopping are more preferred in different objects. The data of the issue are showed below.³⁶

I can identify two main features of the statistics presented in the table⁴³. The first one is that ~~how many~~ the majority of the people who shop online for activities, electronics, clothes and else. And the second ~~one~~ key feature is the percent of people who shop for these things in-store.³⁵

It also worth mentioning that the number of people who prefer buying groceries in-store is the biggest number in (70%) the ~~table~~ diagram. And the in-store shopping for furniture is ~~only a slightly lower~~ a lot lower (59%) even ~~if~~ when it's still on second place.¹²⁶

I prefer shopping online, but mostly for clothes and games, but also I only buy groceries in-store, because only like that I can see if the products are fresh and not defected. Shopping. On the other hand, shopping online gives you more options ~~and~~ of clothes, stores and creators. Also, for people who struggle with communication in real life, online shopping can be easier.

In conclusion, I believe that both ways of shopping should exist, because in different ~~sphere~~ spheres it's better to shop online or in-store.
